

FYP Logbook Entry Sheet

Meeting No: 03

Date: 2024-11-23

Start Time: 10:30 AM

End Time: 12:00 PM

Items Discussed:

1. Presented the completed Work Breakdown Structure (WBS), Gantt Chart, Initial Entity-Relationship Diagram (ERD), and Project Milestone documents.
2. External supervisor verified and signed the documents and the two previous log entries. Supervisor briefly inquired about the project, including its purpose, scope, and planned implementation.
3. Finalized the use of Rational Unified Process (RUP) as the SDLC methodology for the project.

Achievements:

1. Completed and submitted:
 - WBS
 - Gantt Chart
 - Initial ERD
 - Project Milestone
2. Gained verification and approval of the above documents by the external supervisor.
3. Resolved previous confusion about the SDLC methodology by deciding on using RUP.

Problems:

Encountered challenges while preparing the System Architecture diagram during the proposal creation. It was unclear how to effectively represent the relationships and flow between components (e.g., backend, database, and frontend). Resolved the issue with guidance from resources provided by the internal supervisor and online examples.

Tasks for Next Meeting:

Finalize all tools, frameworks, and libraries required to complete the project.
Plan and document the System Components, including their roles and interactions.
Finish the project proposal and verify it with both the external supervisor and internal supervisor.
