FYP Logbook Entry Sheet

Meeting No: 2   **Date: 2024-11-17**

Start Time: 10:00 AM   **End Time: 12:00 PM**

Items Discussed:

1. Presented the finalized project idea and features in detail.
2. Confirmed the use of Python as the core programming language.
3. Chose a relational database, MySQL or PostgreSQL, for data storage.
4. Selected Django as the backend framework.
5. Opted for HTML, CSS, and JavaScript as the front-end technologies.
6. Supervisor approved and finalized the project for the Final Year Project.

Achievements:

1. Finalized the project idea and technology stack.
2. Obtained approval from the supervisor to proceed with the project.

Problems:
There was initial confusion in choosing the appropriate SDLC methodology between RUP(Rational Unified Process) and Scrum. However, after a discussion in class with the internal supervisor, clarity was gained, and a confident decision was made regarding the most suitable methodology for the project moving forward.

Tasks for Next Meeting:

1. Design an initial Entity-Relationship Diagram (ERD) for the project.
2. Create a Work Breakdown Structure (WBS) to organize tasks and milestones.
3. Write and submit the first draft of the project proposal.
